1. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The prior art to US 4,409,844 (Schweiso) discloses a flow rate measuring device comprised of a beaker (10) with graduated markings (12), whereas a specific sampling period is also specified and which establishes a ratio between the collected volume and the flow rate, thus enabling a person to obtain a direct reading of the flow rate by capturing the flow during the specified sampling period and then noting the level of the collected material relative to the markings.
